Dear Valued Potential US Grain Storage / Chief Customer:

US Grain Storage is a highly valued Chief Agri Independent Dealer. Larry and his team have been involved with Chief as a General contractor where complete grain storage projects were sold and installed. Larry's input has also helped us design our material handling equipment line (bucket elevators and chain conveyors) to meet requirements for the commercial grain storage market.

For the past six years, US Grain Storage has been one of our top US dealers in sales of our Titan grain bin line, a leader in the grain storage industry. They have been invaluable to us because of their ability to erect the large commercial bins and their willingness to work outside the normal range of products sold within the United States grain storage industry.

The following list includes bins which Larry has either sold or erected:

Chief's first Titan Model 30 Bin

92' – 10" diameter with a 30 degree and 25,000 pound peak load roof

Chief's first Titan Model 34, 26 Ring Bin

105' – 2" diameter with a 120' and capacity of 750,000 bushels

Chief's first Titan Model 34, 27 Ring Bin

105' – 2" diameter with a 125' and capacity of 7756,000 bushels

In 2007 Chief introduced the grain bin that held 1 million bushels; US Grain Storage erected the first in Edison, Nebraska followed by the second in Beaver Dam, Wisconsin. In 2008, US Grain Storage sold and erected two 1.1 Titans in Wisconsin.

If your business plan requires additional storage for 2009 – 2010, please allow US Grain Storage to provide you a quote for Chief products, including Titan bins, Caldwell aeration and Chief material handling equipment. I believe you will find them very competitive while representing Chief, the New Leader in Commercial Grain Storage.

Sincerely,
CHIEF INDUSTRIES, INC

Ed Benson
