

Big Bubba Cruise Control

Features:

- Automatically runs the sweep auger push tractor
- The ramp up and down of the push tractor is easy on equipment
- One unit can run multiple push tractors eliminating the need for additional units
- Settings for a second pass at a higher speed decreases bin clean up time

Options:

- Optional wheel slip sensor slows tractor down saving wear on the tires
- Optional plug sensors for when grain buries the sweep which shuts off the tractor but continues to drive the auger
- A second sensor that will sense and shut off the tractor if the reclaim conveyor becomes overfilled
